

Peter Trier Jørgensen

GRC and security leader · MSc Security Risk Management · Currently leading a 7-person Data Security, Risk & Compliance practice at VENZO Tech

A GRC and security leader with a background in security architecture and a Master's in Security Risk Management. Builds and runs risk, compliance and information security programmes across enterprise and public-sector organisations, with deep technical grounding in the Microsoft Security suite. *I lead through freedom and responsibility – hiring well, setting clear context and standards, and giving people real ownership.* My approach to GRC is risk-first rather than compliance-first: compliance is a floor, not the goal.

2021 — Now
VENZO Tech

Security Architect & Team Lead – Data Security, Risk & Compliance

Advisor and architect to large enterprises and public-sector organisations on data security, information protection and GRC — covering both technical implementations and organisational change.

- Delivered 20+ engagements across enterprise and public-sector clients, ranging from full GRC programme design to enterprise-wide Microsoft Security implementations, including Purview rollouts at 10,000+ seats.
- Built and lead VENZO's Data Security and GRC practices — defining methodology, service offerings and delivery standards.
- Lead a team of 7 consultants spanning junior to senior profiles, with a development focus on growing juniors into specialists and giving seniors meaningful ownership.
- Architect end-to-end security solutions: translate business and risk requirements into framework, design and implementation across Microsoft Purview, Entra ID and Defender.
- Design and run GRC programmes grounded in ISO 27001/27005, NIS2 and GDPR — from full programme build-outs to targeted control deliveries and risk assessments.
- Advise across the stakeholder spectrum, from working-level technical teams to senior management and C-suite (CISO, CIO, executive committee).

2020 — 2021
Danske Bank ·
Security

Associate Information Risk Analyst

- Owned the service maintaining and communicating Danske Bank's information and cyber security framework — built and ran the underlying processes and procedures, and explained the framework to internal and external stakeholders.
- Conducted ongoing cyber security risk and due-diligence assessments on projects and third-party partners.
- Acted as internal advisor to business teams on cyber security risk in a consultant-style function.

2017 — 2020
Danske Bank ·
Group
Information
Security

IT Student

- Supported GDPR implementation and broader IT regulatory work, translating requirements into operational impact for Danske Bank Group.
- Contributed to risk analyses and vendor / third-party risk management — both providing information to partners and managing inbound risks to the bank.

01

2015 — 2017
JHN Processor

EMPLOYMENT — *continued*

Junior Consultant

- Owned full project lifecycle for analytical consulting engagements with public and private clients in waste recycling — from research design and data gathering through analysis, reporting and client communication.
- Contributed to business development of the firm.

2016 — 2017
Vigeo Eiris

ESG Analyst

- Analysed companies' ESG performance and risks for socially responsible investors, applying a structured rating methodology to produce assessments and reports.
- Built working knowledge of how ESG factors affect company operations and risk profile.

2016
Chile
Transparente ·
Transparency
International,
Chile

Intern

- Researched Chilean anti-corruption legislation and initiatives and their impact on firms, citizens and the public sector.
- Worked entirely in Spanish, significantly improving working proficiency.
